QMC002

Licence for communication with ifm IO-Link master

moneo edgeConnect AL LIC

Application

Application

Connectivity

Device management

communication interface for ifm IO-Link masters
connection to IO-Link devices and transfer of cyclical process and meta data from the machine level via ifm IO-Link master type DataLine
Translation of process and meta data into readable information for processing in current and future moneo modules and add-ons
IO-Link-data are read from the connected units and provided to the moneo apps in a structured form
reading and provision of selected meta data of the ifm IO-Link master and the connected IO-Link devices
name of master and name of device
Application Specific Tag - input and storage of application-specific information

QMC002

Licence for communication with ifm IO-Link master

moneo edgeConnect AL LIC

Data management		Reading and provision of cyclic process-data-in values (PDI) of IO-Link devices	
		transformation of the PDI data into readable	
		information by means of the device-specific IODD	
		parsing of the binary process data	
		application of the defined gradients	
		provision of process data-specific units defined in the IODD	
		Provision of IO-Link BLOBs (Binary Large Objects) for selected moneo applications and add-ons	
Software / programming			
Language		German; English; French; Italian; Spanish;	
		Portuguese; Chinese; Japanese; Korean; Russian	
Data carrier		download	
Type of licence		single licence	
Licence class		full version	
System requirements			
Additionally required software		moneo software download	
Mechanical data			
Weight	[g]	0.001
