## Material list: choosing the correct TW unit

Various materials and surface finishes have different emissivity values. The emissivity of many objects, metals in particular, is highest at short wavelengths. Therefore, the selection of TW sensors has different wavelength ranges. Ideally the shortest wavelength possible should be chosen.

In the chart below, there is a list of various materials and the corresponding recommended unit type. The value listed is the recommended EPSI (emissivity) setting for the TW sensor.

Note: The emissivities are approximate values, to determine the temperature precisely a reference value measurement should be made.
If there is $a-$, that TW is not recommended.

| Material | TW2000 / TW2100 | TW2001 / TW2101 / TW2011 | TW2002 |
| :--- | :---: | :---: | :---: |
| Alumina | 76 | - | - |
| Aluminum, finished | - | 10 | 25 |
| Aluminum, polished | - | 5 | 15 |
| Asbestos cement | - | 60 | 70 |
| Asphalt | $90 \ldots 98$ | - | - |
| Baking oven | 96 | - | - |
| Bitumen (roofing cardboard) | 96 | - | - |
| Brass, oxidized | $56 \ldots . .64$ | - | - |
| Brass, oxidized (tarnished) | - | 50 | 70 |
| Bread in the oven | 88 | - | - |
| Brick | $93 \ldots 96$ | 85 | 90 |
| Bronze, finished | - | 15 | 30 |
| Bronze, polished | - | 1 | 3 |
| Cement | 90 | - | - |
| Chamotte | 75 | 40 | 50 |
| Chromium, blank | - | 15 | 30 |
| Clinker brick, glazed | 75 | - | - |
| Concrete | $55 \ldots . .65$ | - | - |
| Copper, oxidized | 78 | 70 | 90 |
| Enamel | $84 \ldots .88$ | - | - |
| Glass | $85 . .95$ | - | - |
| Gold and silver | - | 1 | 2 |
| Graphite | 98 | - | - |
| Graphite, finished | - | 85 | 90 |
| Iron oxide | $85 \ldots 89$ | - | - |
| Iron, heavily scaled | - | 90 | 95 |
| Iron, molten | - | 15 | 30 |
|  |  |  |  |

| Material | TW2000 / TW2100 | TW2001 / TW2101 / TW2011 | TW2002 |
| :---: | :---: | :---: | :---: |
| Iron, rolling skin | - | 75 | 90 |
| Leather | 75... 80 | - | - |
| Lime plaster | 91 | - | - |
| Marble | 94 | - | - |
| Nickel | - | 8 | 20 |
| Paints and lacquers, matt | 96 | - | - |
| Paints and lacquers, shiny | 92 | - | - |
| Paper | 70... 94 | - | - |
| Plaster | 80... 90 | - | - |
| Plastics, opaque | 65... 95 | - | - |
| Porcelain, glazed | - | 50 | 60 |
| Porcelain, rough | - | 75 | 85 |
| Pottery, glazed | - | 85 | 90 |
| Radiator | 80... 85 | - | - |
| Rubber, black | 94 | - | - |
| Sand | 90 | - | - |
| Skin, human | 98 | - | - |
| Slag | - | 80 | 85 |
| Soil | 92... 96 | - | - |
| Soot | - | 90 | 95 |
| Steel, antitrust | 45 | - | - |
| Steel, red oxidized | 69 | - | - |
| Table stove | 95 | - | - |
| Textiles | 75... 88 | - | - |
| Water | 92... 98 | - | - |
| Wood | 80... 90 | - | - |
| Zinc | - | 40 | 60 |
