# What if you could guarantee that you never misplace an asset?

Display controller

- Reliable tracking of returnable containers, racks, and bins, using IP65 industrial hardened components and M12 connections

- Remote mountable and does not require a control panel/cabinet

- High visibility light stack and audible buzzer effectively conveys positive reads, or lost/damaged tags to operators

- Ethernet and IO-Link supplemental devices communicate directly to the controller, offering device health and high reliability

- ifm display Controller provides local pre-processing and data package management to ensure that your data is clean and accessible

- Support of all GRAI tracking standards, as well as custom tracking identifiers with tag data, direction, and time stamp communicated directly to a database
