0	100	0
0	100	0

  

The calibration is performed in accordance with the requirements of the "Technical Rules" and other relevant documents of the PTB in connection with the international temperature scale and the SI units.

The calibration is performed in accordance with the "Technical Rules" and other relevant documents of the PTB in connection with the international temperature scale and the SI units.

The accuracy of the measurement is determined by the uncertainty of the measurement method used and other factors during the calibration. The measured value is given in the certificate and is valid for the measurement conditions.

The present certificate is valid for the measurement conditions and is not valid for other conditions.

The present certificate is valid for the measurement conditions and is not valid for other conditions.

Wichtig: Dieses Zertifikat wurde automatisch erstellt und ist ohne Unterschrift gültig.  
Important: This certificate was automatically generated and is valid without signature.
